Professional Summary

B.Tech CSE graduate with hands-on cybersecurity project experience in SIEM monitoring (Splunk, ELK, Wazuh) and vulnerability assessment. Recognized by NASA, DHS, WHO, and OpenAI for security research. Proven impact: discovered authentication bypass affecting 500+ accounts with 95% remediation success. Skilled in threat detection, log analysis, and incident response. Actively seeking SOC Analyst (L1) role and open to 24x7 operations.

Projects and Practical Experience

Institutional Security Assessment – LBS College of Engineering

Feb 2025

Tools: Nessus Professional, Burp Suite

- Collaborated with the security team to conduct a comprehensive infrastructure assessment.
- Discovered an authentication bypass impacting 500+ accounts; improved portal security with team fixes.
- Identified 5+ critical vulnerabilities and achieved 95% remediation in 6 days.

Capture The Flag (CTF) Platform Development

Mar 2025

Tools: Web Security, PHP, MySQL, Linux

- Designed and deployed a CTF platform with 8+ vulnerable labs covering SQLi, XSS, command injection, and misconfigured services.
- Built a gamified environment to simulate exploitation scenarios for safe, hands-on learning.
- Enhanced SOC training by integrating labs that reflected real-world attack and detection workflows.

Splunk SIEM Lab Project – Windows Event Analysis

Jan 2025

Tools: Splunk Enterprise, Windows Event Logs

- Deployed Splunk Enterprise to collect and centralize Windows event logs for SOC-style monitoring.
- Developed custom SPL queries and dashboards to detect brute-force logins and privilege escalation attempts.
- Automated alert rules to streamline incident triage and improve incident response efficiency.

ELK Stack Threat Detection Lab

Apr 2025

Tools: Elasticsearch, Kibana, Winlogbeat, Sigma Rules

- Implemented ELK Stack infrastructure with Winlogbeat for centralized log collection and real-time correlation.
- Created Sigma-based detection rules and converted them into Lucene queries for advanced threat hunting.
- Documented investigation workflows and built incident response playbooks to strengthen SOC processes.

Security Achievements

NASA Vulnerability Disclosure Program Recognition (Bugcrowd)

Nov 2024

OpenAI Security Research Program Acknowledgment (Bugcrowd)

Feb 2025

World Health Organization Security Research acknowledgments

Jul 2025

U.S. Department of Homeland Security Recognition (Bugcrowd)

Nov 2024

Education

Cybersecurity Professional Training (Diploma-equivalent),
Techbyheart Academy, Bangalore

Aug 2024 – May 2025

• SOC operations, ethical hacking, security testing.

Bachelor of Technology in Computer Science and Engineering,
APJ Abdul Kalam Technological University

Nov 2020 – Jun 2024

• Programming, Databases, Computer Networks.

Technical Skills

Threat Detection and SOC Operations: Hands-on with SIEM tools (Splunk, ELK, Wazuh) for monitoring, log correlation, alert triage, false-positive analysis, and basic incident escalation. Familiar with playbook execution, and incident workflows

Vulnerability Assessment and Pentesting: Skilled in Burp Suite Pro, OWASP ZAP, Nessus, Metasploit, Nikto, and Nmap for web app testing, scanning, risk rating, and remediation reporting.

Threat Intelligence: MISP, AlienVault OTX, VirusTotal, OSINT Tools

Network and Security Technologies: Strong knowledge of TCP/IP, OSI model, Wireshark, Nmap, Snort IDS/IPS, packet capture analysis, and system log review

Frameworks and Standards: Knowledge of OWASP Top 10, Incident Response Lifecycle, SOC Procedures, and ISO 27001 Basics

Operating Systems: Kali Linux, CentOS, Windows

Certifications

Certified Ethical Hacker version 13 (CEH v13), EC-Council	May 2025
Advanced SOC Analyst (ASA), Techbyheart Academy	Aug 2025
Certified Security Tester (CST), Techbyheart Academy	Aug 2025
Google Cybersecurity Professional Certificate, Coursera	Aug 2024
Introduction to Cybersecurity, Cisco Networking Academy	Aug 2024
CompTIA A+ Network Fundamentals, Coursera	Aug 2024
Linux Crash Course, EC-Council	Jun 2024

Additional Information

Languages: English (Fluent), Hindi (Intermediate), Malayalam (Native)

Soft Skills: Technical documentation, Cross-functional collaboration, Rapid technology adoption, Security research methodology, and a proactive mindset
