

DEVADATH A

Cybersecurity Analyst

devadathnair4397@gmail.com | +91 9496113175 | linkedin.com/in/devadathcyber001 | devadathappu.github.io/profile/

Professional Summary

Cybersecurity Analyst with CEH credential and hands-on experience in SOC operations, SIEM monitoring, threat detection, and vulnerability management. Recognized by NASA, DHS, WHO, and OpenAI for responsible security research and vulnerability disclosures. Skilled in incident response, detection rule creation, and threat hunting using tools like Splunk, ELK, and Wazuh, with a proven record of building detection labs, CTF platforms, and institutional security assessments. Strong in documentation, collaboration, and rapid adoption of emerging security technologies.

Security Achievements

NASA Vulnerability Disclosure Program Recognition (Bugcrowd)	Nov 2024
OpenAI Security Research Program Acknowledgment (Bugcrowd)	Feb 2025
World Health Organization Security Research acknowledgments	Jul 2025
U.S. Department of Homeland Security Recognition (Bugcrowd)	Nov 2024

Education

Bachelor of Technology in Computer Science and Engineering, APJ Abdul Kalam Technological University	Nov 2020 – Jun 2024
• Programming, Databases, Computer Networks.	
Cybersecurity Professional Training (Diploma-equivalent), Techbyheart Academy, Bangalore	Aug 2024 – May 2025
• SOC operations, ethical hacking, security testing.	

Technical Skills

SIEM and Monitoring: Splunk, ELK Stack, Wazuh, Log Analysis, Alert Triage, Incident Response
Vulnerability Assessment and Pentesting: Burp Suite Pro, OWASP ZAP, Nessus, Metasploit, Nikto, Nmap
Threat Intelligence: MISP, AlienVault OTX, VirusTotal, OSINT Tools
Network and Security Technologies: Wireshark, Nmap, Snort IDS/IPS, protocol analysis
Frameworks and Standards: OWASP Top 10, Incident Response Lifecycle, SOC Procedures, ISO 27001 Basics
Operating Systems: Kali Linux, CentOS, Windows

Certifications

Certified Ethical Hacker (CEH), EC-Council	May 2025
Advanced SOC Analyst (ASA), Techbyheart Academy	Aug 2025
Certified Security Tester (CST), Techbyheart Academy	Aug 2025
Google Cybersecurity Professional Certificate, Coursera	Aug 2024
Introduction to Cybersecurity, Cisco Networking Academy	Aug 2024
CompTIA A+ Network Fundamentals, Coursera	Aug 2024

Projects and Practical Experience

Institutional Security Assessment – LBS College of Engineering

Feb 2025

Tools: *Nessus Professional, Burp Suite*

- Collaborated with the security team to conduct a comprehensive infrastructure assessment.
- Discovered an authentication bypass impacting 500+ accounts; improved portal security with team fixes.
- Identified 5+ critical vulnerabilities and achieved 95% remediation in 6 days.

Capture The Flag (CTF) Platform Development

Mar 2025

Tools: *Web Security, PHP, MySQL, Linux*

- Designed and deployed a CTF platform with 8+ vulnerable labs covering SQLi, XSS, command injection, and misconfigured services.
- Built a gamified environment to simulate exploitation scenarios for safe, hands-on learning.
- Enhanced SOC training by integrating labs that reflected real-world attack and detection workflows.

Splunk SIEM Lab Project – Windows Event Analysis

Jan 2025

Tools: *Splunk Enterprise, Windows Event Logs*

- Deployed Splunk Enterprise to collect and centralize Windows event logs for SOC-style monitoring.
- Developed custom SPL queries and dashboards to detect brute-force logins and privilege escalation attempts.
- Automated alert rules to streamline incident triage and improve incident response efficiency.

ELK Stack Threat Detection Lab

Apr 2025

Tools: *Elasticsearch, Kibana, Winlogbeat, Sigma Rules*

- Implemented ELK Stack infrastructure with Winlogbeat for centralized log collection and real-time correlation.
- Created Sigma-based detection rules and converted them into Lucene queries for advanced threat hunting.
- Documented investigation workflows and built incident response playbooks to strengthen SOC processes.

Additional Information

Languages: English (Fluent), Hindi (Intermediate), Malayalam (Native)**Soft Skills:** Technical documentation, Cross-functional collaboration, Rapid technology adoption, Security research methodology
